

YS2R6X400E9183544 / BMS, Brake management system / E 37, ABS control unit / ABS E / V, Solenoid valves / V193, Control valve, control pressure, trailer circuit

V193, Control valve, control pressure, trailer circuit

V193, Control valve, control pressure, trailer circuit

The control valve adapts the control pressure to the trailer circuit when hill hold is activated.

The control unit activates the control valve functions as necessary: When hill hold is activated, the control valve maintains constant control pressure to the trailer circuit.
